

Coin Signal Scanner

READ-ONLY MARKET SCANNING

3 scans free · one-time unlock for unlimited

FOR CRYPTO MARKET READERS

Your clarity edge in noisy markets

Rank liquid names in seconds with multi-indicator signal cards—RSI, volume rhythm, drawdown context, and support and resistance from recent price action. Save any run to your Catalog and replay the exact scores and reasons later.

1

Scan

Top-volume universe or your paste-in watchlist—ranked signal cards with transparent scores and plain-language reason lines.

2

Compare

RSI and volume context, levels, and drawdown framing in one view—so you're not lost in tabs and screenshots.

3

Catalog

One tap saves a timestamped snapshot—reopen prices, ranks, and reasons exactly as they were when you saved.

WHY IT HELPS

- ✓ **Conviction, not hype.** Readable signals instead of spreadsheet archaeology.
- ✓ **Your universe.** Liquid scan or custom list—you choose what gets scored.
- ✓ **Research receipts.** Catalog snapshots show what the tape looked like at decision time.
- ✓ **Read-only by design.** No wallet, no keys, no trades in-app—public market data only.

BEST FOR

Active readers

Technical traders

Swing & position scouts

Market journalers

Liquidity-first scanners

Informational signals only—not financial advice. Past indicator behavior does not guarantee future results.

Built for conviction in volatile markets.

Free to try with three user-initiated scans. Unlock unlimited scans with a one-time in-app purchase—no subscription (price shown in the app). Hammoch Apps.
